PROFESSIONAL SUMMARY

Data Engineer with 3+ years building cloud data pipelines for analytics and data science. Specializes in point-of-sale (POS) data integration, Snowflake and dbt modeling, AWS infrastructure, and reporting reconciliation.

PROFESSIONAL EXPERIENCE

Data Engineer | CDAI | August 2025 – Present

- Build and scale POS pipelines for a platform serving 50+ clients across 15 systems and variants, processing tens of gigabytes daily.
- Connect AWS ingestion to Snowflake warehousing and dbt transformations for analytics and data science.
- Maintain reporting variance below 1% by reconciling pipeline outputs against POS reporting portals.
- Design and maintain data architecture, infrastructure, orchestration, and DataOps workflows.

Data Engineer | E15 Group | June 2023 – August 2025

- Built and maintained end-to-end pipelines and data systems for analytics and data science.
- Developed ingestion, modeling, orchestration, and infrastructure with security and data management built into ongoing operations.

Biomedical Service Technician | Crothall Healthcare | Tampa, FL | March 2022 – May 2023

- Supported preventive maintenance on Stryker ICU beds and stretchers, contributing to a 25% department KPI improvement; tracked and analyzed work orders and incidents in CMMS software.

Electronic Technician II | Philips Invivo | Gainesville, FL | April 2021 – March 2022

- Contributed to a 20% increase in team production productivity through MRI module assembly, soldering, and calibration, adhering to Philips/Invivo and IPC standards.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, PySpark, Git.

Cloud & Storage: Amazon Web Services (AWS): S3, Glue, Lambda, Kinesis, EventBridge, CloudWatch, EKS (Kubernetes); Apache Iceberg.

Warehousing & Transformation: Snowflake, dbt, data modeling, ETL/ELT pipelines.

Orchestration & Operations: Apache Airflow, event-driven pipelines, streaming, data quality, reconciliation, monitoring, DataOps.

POS Systems: Amazon JWO, Mashgin, AiFi, Square, MICROS, Retail Cloud (selected).

Academic Tools: Apache Spark, Databricks, Microsoft SQL Server, SQLite, R, Tableau.

EDUCATION

Master of Science in Business Analytics and Information Systems

University of South Florida | Tampa, FL | 2023

Associate in Applied Science, Biomedical Service Technician: Clinical Engineering

Bates Technical College | Tacoma, WA | 2018

Bachelor of Engineering in Electronics and Telecommunications

Universidad Politecnica Salesiana | Cuenca, Ecuador | 2016

SELECTED ACADEMIC PROJECTS

Inmate Reintegration Program Database: Designed and implemented a relational database using Microsoft SQL Server and draw.io.

MLB Attendance Prediction: Developed machine learning models using Databricks and Apache Spark to analyze attendance for the 2016 baseball season.

CERTIFICATIONS

Google Data Analytics Professional Certificate | 2021
