EDUCATION

- | | |
|---|------|
| • Master of Science in Business Analytics and Information Systems
University of South Florida, Tampa, FL | 2023 |
| • Bachelor of Engineering in Electronics and Telecommunications
Universidad Politecnica Salesiana, Cuenca, Ecuador | 2016 |
| • Associate in Applied Science, Biomedical Service Technician: Clinical Engineering
Bates Technical College, Tacoma, WA | 2018 |

TECHNICAL SKILLS

Cloud & Ingestion: AWS: S3, Glue, EKS/Kubernetes, Lambda, CloudWatch, Kinesis, EventBridge; Apache Iceberg tables.

Warehouse & Modeling: Snowflake, dbt, SQL, data modeling, and data architecture.

Orchestration & Streaming: Apache Airflow; event-driven and streaming Amazon JWO POS pipelines.

Data Quality & Operations: POS reporting reconciliation (<1% variance); monitoring, maintenance, and DataOps.

Platform Engineering: Security-aware design, data management, infrastructure, and software engineering.

Languages: Python, SQL, PySpark, and Git.

ACADEMIC PROJECTS

MLB Attendance Prediction Project: Developing machine learning algorithms in Databricks and Apache Spark for the 2016 Baseball Season to improve profitability. Highest accuracy model ~83%.

Inmate Reintegration Program Database Design: Database design, development, and implementation for an inmate reintegration program using draw.io and Microsoft SQL Server.

Intelligent Tourist Website: Developed a website using HTML5, CSS3, and JavaScript to suggest tours and excursions in groups based on solo-traveler preferences.

Causes of Divorce in the US: Created a report on the reasons for divorce in the United States using SQLite, RStudio, Python, and Tableau to identify significant factors during marital therapy.

WORK EXPERIENCE

Data Engineer | CDAI | August 2025 – Present

- Build and scale end-to-end POS data pipelines across multiple POS systems and clients, from AWS ingestion through Snowflake and dbt modeling.
- Strengthen data quality and governance by reconciling pipeline outputs with POS reporting portals, maintaining variance below 1%.
- Design and maintain scalable data architecture, infrastructure, orchestration, and DataOps practices that support analytics and data science use cases.

Data Engineer | E15 Group | June 2023 – August 2025

- Built and maintained end-to-end data pipelines and foundational data systems for analytics and data science use cases.
- Developed ingestion, data modeling, orchestration, infrastructure, and DataOps capabilities with security and data management considered throughout.

Biomedical Service Technician | Crothall Healthcare | Tampa, FL | March 2022 – May 2023

- Tracked, monitored, and analyzed work orders and incidents in CMMS software.
- Supported preventive maintenance on Stryker ICU beds and stretchers, increasing the Clinical Engineering department KPI by 25%.

Electronic Technician II | Philips Invivo | Gainesville, FL | April 2021 – March 2022

- Increased team line-production productivity by 20% through meticulous assembly, soldering, and calibration of MRI modules while adhering to Philips/Invivo and IPC standards.
- Analyzed electromagnetic units through network analyzers, oscilloscopes, and multimeters.

ACCOMPLISHMENTS

- Google Data Analytics Professional Certificate – 2021: Data cleaning, analysis, and visualization with SQL, R, and Tableau; communicating findings through dashboards and visualizations.
- Distinguished as a top-performing student and member of Beta Gamma Sigma (ΒΓΣ) for business excellence and Phi Theta Kappa (ΦΘΚ) for academic achievement in associate degree programs.
- Received All-Washington Academic Excellence Team Award as one of the top three students at Bates Technical College in 2018.
- Published research paper, "Analysis of the Optimal Trajectory in Weightlifting: Snatch Style," in the 2015 CHILEAN Conference on Electrical, Electronics Engineering, Information and Communication Technologies (CHILECON). DOI: 10.1109/Chilecon.2015.7400379
- Published research paper, "Chromatic Dispersion Analysis in a WDM-PON Network Using FBG Compensators," in IEEE Latin America Transactions. DOI: 10.1109/TLA.2016.7555260
